

Labib Tajremin

Results-driven Software Engineer with expertise in designing and developing scalable SaaS solutions, multi-tenant architectures, and microservices-based systems. Skilled in .NET, React, and Azure cloud services, with a strong foundation in system design, data synchronization, and enterprise application development. Adept at collaborating in Agile environments to deliver high-quality, maintainable software solutions.

Work Experience

Software Engineer L-II

VivaSoft LTD | May 2023- Present

- Architected and implemented a multi-tenant, multi-database SaaS system enabling secure data isolation and efficient synchronization across clients.
- Designed and deployed microservices-based applications on Azure, improving scalability and reducing deployment time through CI/CD pipelines.
- Developed a data synchronization engine integrating third-party APIs, automating updates every 30 minutes and supporting manual sync for real-time accuracy.
- Led system design initiatives for tenant management, database architecture, and permission control, enhancing modularity and maintainability.
- Collaborated with international clients in Agile sprints to deliver tailored enterprise solutions.

Tech stack: .Net(C#), React JS, Azure Functions, Azure Files, Azure Blob Storage, Azure Pipelines (CI/CD), Azure DevOps, SQL Server.

Software Engineer

ReliSource | September 2021- May 2023

- Delivered enterprise-grade web and mobile applications using OutSystems, accelerating development cycles by 40%.
- Designed and implemented custom client solutions with scalable architectures and optimized database performance.
- Integrated third-party APIs and services using Service Studio and Integration Studio, ensuring seamless interoperability.
- Partnered with cross-functional teams to deliver high-quality software in Agile environments.

Tech stack: C#, Asp.net, Asp.net Core, JavaScript, Angular, SQL Server, MySQL

Software Engineer

Adipster Tech Limited | July 2020 - August 2021

- Developed and maintained enterprise applications using .NET technologies, ensuring code quality and adherence to best practices.
- Coordinated with team members to streamline development workflows and improve delivery timelines.

CORE COMPETENCIES

- Good knowledge of C# and .Net technologies.
- Solid understanding of OOP, Data Structure & Algorithm.
- Solid Understanding of Database Design and Entity Framework.
- Working experience with Agile development process.
- Strong problem-solving skills.
- Familiar with the best practices of Software Development.
- Quick learner and flexible.
- Strong analytical and observation skills.
- Rapid App development skills using Low-Code platforms such as OutSystems.
- Working experience with Linux operating system.
- Working experience with various kinds of machine learning algorithms.
- Proficient in HTML, CSS.
- Managing project through Github, Azure DevOps, Bitbucket.
- Very good at communication, analytical, interpersonal skills, and capable of performing independently or as part of a team.

AREA OF TECHNICAL EXPERTISE

- **Languages:** C#, Java, JavaScript, C++, Python.
- **Tools:** Visual Studio, Visual Studio Code, Rider, Service Studio, Integration Studio, Eclipse, AnyPoint Studio, SQL Server Management Studio.
- **Web:** ASP.NET, ASP.NET Core, React JS, Angular, Bootstrap.
- **Cloud Service:** Azure Blob Storage, Azure Key Vault.
- **Databases:** SQL Server, MySQL, PostgreSQL.
- **Technologies/Frameworks:** .NET Framework, .NET Core, ASP.NET, React JS, Java Spring, Entity Framework, Rest API, Okta, Telerik & Kendo.
- **Low Code Platform:** OutSystem, MuleSoft.
- **OS Platforms:** Windows, Linux.
- **Software Version Control:** Git, Azure DevOps, Bitbucket

Involvement with Key projects

• HR Solution

Overview: This project involves the development of a comprehensive HR solution utilizing .NET 7 and React.js. It provides a centralized HR solution catering to multiple clients, each with their own distinct user base and data isolation. The system encompasses various HR functionalities including leave management, attendance tracking, employee management, salary administration, and tax management. Leveraging modern technologies, the solution aims to streamline HR processes, enhance organizational efficiency, and provide a user-friendly experience for both administrators and employees.

Language: C#, JavaScript

Role: Developer.

Platform: .NET 7, React JS

• Multi-Tenant & Multi-Db Data Sync System

Overview: Developed a multi-tenant, multi-database system that synchronizes data from a third-party database to tenant databases. The system allows tenants to either create their own databases or let the application generate one on the application server. Tenants can manage user permissions for data synchronization and reading. The application automatically syncs data at 30-minute intervals, with an option for users to initiate a manual sync for real-time updates.

Role: Developer, System Design.

Platform: .NET, SQL Server, Entity Framework, Background Services, Angular JS, Typescript

• Document Sharing Portal

Overview: The web portal is designed to facilitate document sharing among various client entities based on their roles and customizable sharing preferences. Each client has the flexibility to manage document-sharing options according to their specific needs and preferences.

Language: C#, JavaScript, SQL

Platform: ASP.NET Core, Angular, SQL, Okta (As IdentityServer).

Role: Developer.

• Clinical Trial Management

Overview: A group of applications used to keep track of clinical trial data. Each application has a unique user base and set of job requirements and is utilized to sustain various phases of a clinical study.

Language: C#, JavaScript, SQL, HTML, Kendo(Telerik).

Platform: ASP .Net MVC, ASP .Net Core, kendo.

Role: Full-stack developer.

• Lease Management

Overview: An application that works under the process of lease origination. This modular application which is developed using OutSystems contains application submission, verification, credit underwritings, and custom pricing.

Language and Technology: OutSystems platform, Service Studio, SQL Server, React JS.

Role: Developer.

• Custom Windows Service

Overview: Contributed to the development of Windows services that facilitated the automated retrieval, processing, and storage of various file types (XML, PDF, Excel) from a secure FTP location. Responsibilities included database updating, log file creation, and output XML generation. Worked within a custom solution team to ensure the timely and accurate completion of tasks.

Language: C#.

Role: Developer.

Platform: .NET Core.

• Measurement Automation for Structural Design (2020-2021)

Overview: Developed a web-based application for civil engineers to automate structural measurements, perform real-time calculations, and export results to Excel for design documentation and analysis. Responsibilities included building the full-stack solution with intuitive UI, calculation engine, and seamless data export functionality. Collaborated to deliver a production-ready tool optimizing engineering workflows.

Language: HTML5, CSS, JavaScript (Frontend); Spring Framework (Backend)

Role: Developer.

Live Demo: <http://CivilAutoCad/CivilProject/login>.

Academic History

Bachelor Of Science
United International University
Department of Computer Science &
Engineering
Session 2016-2020
CGPA 3.87 out of 4

Higher Secondary School
Certificate
Dhaka City College (Dhaka Board)
Science
Session 2013-2015
GPA 5 out of 5

Secondary School Certificate
Government Laboratory High School
(Dhaka Board)
Science
Session 2002-2013
GPA 5 out of 5
